HVAC:

Cooling is provided to the entire building at a rate of 1.25 CFM/SQFT. For laboratory space this is derived from 100% outside air AHU(s). For office space this is derived from return air AHU(s). All AHUs are capable of VAV operation. A condenser water and reheat water allowance is provided to each tenant via valved, capped risers at each floor. Shaft space will be provided to each tenant for fume hood exhaust ductwork to be connected to high dilution, plume type exhaust fans. Heating and cooling is controlled by a building management system.

ELECTRIC SYSTEMS:

The Property is served by three 2,000-KVA transformers feeding two 3,000-amp service switches which provide 277/480 volts to the building and is fed by two substations. Capacities as follows:
Laboratory normal power: 10.5 W/sf
Laboratory optional standby power: 4 W/sf
Office normal power: 4W/sf

ELEVATORS:

The Property utilizes four geared-traction, 3,500-lb. capacity Dover passenger elevators and one geared traction, 4,000-lb. capacity Dover combined service and passenger elevator. The Property also has one hydraulic Dover elevator, which serves the basement and ground floor exclusively.

EMERGENCY GENERATOR AND SWITCHGEAR:

The building is equipped with a 300kw emergency life safety generator. In addition, there is an in-place switchgear in the building garage that is connected to the office floors. This system allows for a mobile generator connection giving a prospective tenant back-up power for their entire Premises in the event of an emergency. An optional standby generator will be provided to supply up to 4W/sf for laboratory tenants and to support the building's central air, exhaust and boiler plant.

FIRE SAFETY SYSTEMS:

The building is fully equipped with a fire/smoke detection system. Speakers, strobes and phone stations are located throughout the building. The building is fully sprinklered with a traditional wet pipe system from the first to eighth floors inclusive. The parking garage is sprinklered by a dry pipe system.

UTILITIES:

Electric and Gas: PSE&G
Water and Sewer: City of Jersey City
Telephone: Verizon

TELE-COMMUNICATIONS:

The building offers cutting edge connectivity from multiple high capacity Internet Providers and Local Exchange Carriers. Geographically diverse conduit pathways from different communication manholes route into the building demarcation and tenant connectivity is supported by two spatially-diverse risers within the building. This provides communications carrier connection diversity, reliability and redundancy.

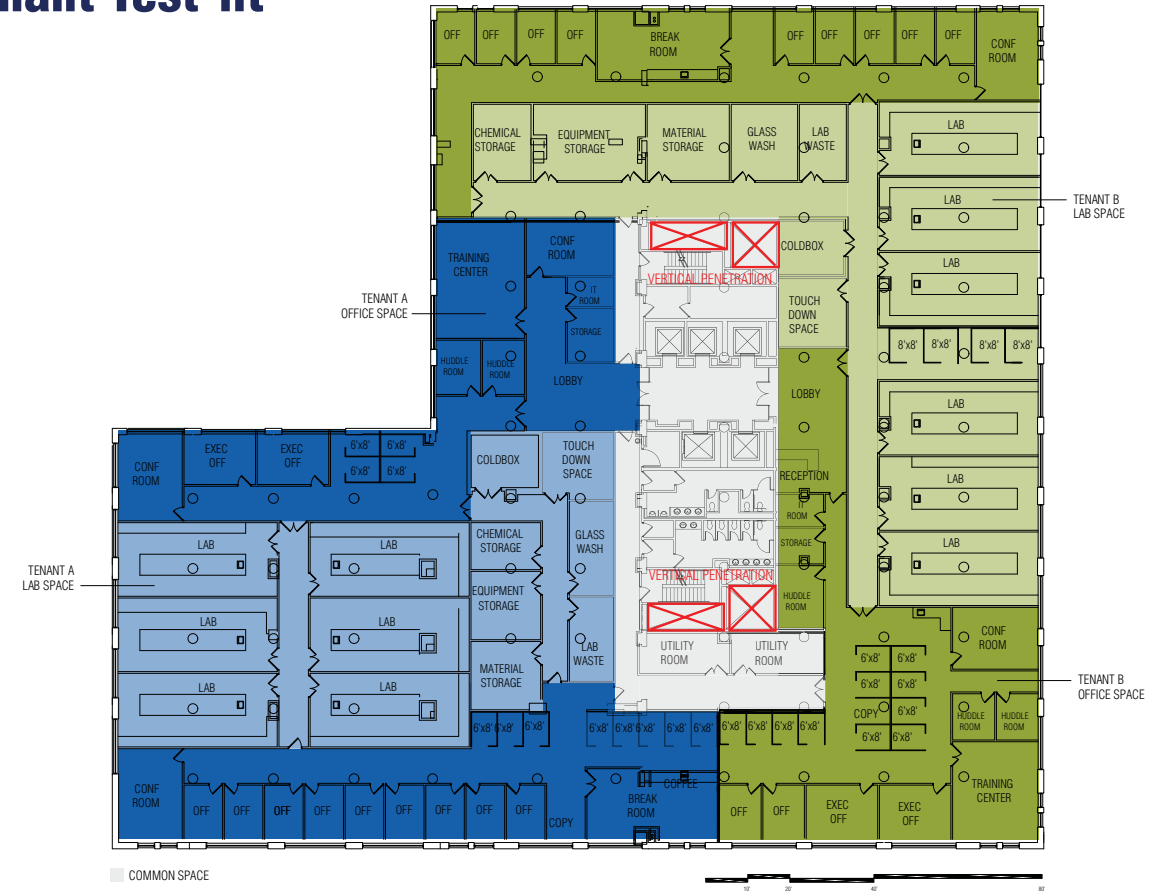

ADA COMPLIANCE:

All ADA requirements have been addressed as part of the Property's redevelopment and construction. The Property is equipped with handicapped accessible parking, ramps and curb cuts, as well as strobes, lights and handicapped accessible restrooms.
