Data Collection Summary

Traffic Volume Data

Seven day – 24 hour approach counts were collected with classification data between January 24, 2022 and January 30, 2022. Data was collected while study area schools were in session and while COVID19 protocols were in effect. The seven day – 24 hour counts were collected at the following locations:

1. LA 447 between Florida Blvd and Fern St/Aydell Ln Southbound
2. LA 447 between Walmart Dwy/CVS Dwy and Pendarvis Ln Northbound

A map with the corresponding count locations is presented in **Appendix A.2**.

Peak Period Determination

The traffic volumes from the seven day – 24 hour approach counts were reviewed to identify peak periods for the additional data collection. The counts were graphed by location and were reviewed to identify trends and/or anomalies. These graphs are presented in the following Figures:

- **Figure A1:** LA 447 between Florida Blvd and Fern St/Aydell Ln Northbound
- **Figure A2:** LA 447 between Florida Blvd and Fern St/Aydell Ln Southbound
- **Figure A3** LA 447 between Walmart Dwy/CVS Dwy and Pendarvis Ln Northbound
- **Figure A4:** LA 447 between Walmart Dwy/CVS Dwy and Pendarvis Ln Southbound

A review of **Figures A1** through **A4** indicated one anomaly that occurred the afternoon of Sunday, January 30th from 11:30 AM – 12:00 PM at LA 447 between Florida Blvd and Fern St/Aydell Ln on **Figure A2**. The source of the anomaly was due to church services located around the count location.

Based on a review of **Figure A1** through **A4**, the recommended peak periods for additional data collection for the study area are weekdays at **6:15 AM – 8:15 AM** and **2:00 PM – 5:30 PM**. The figures are presented in **Appendix A.1**.
