

Woodward Development and Construction, Inc.

Making It Happen...

Woodward's success is achieved through committing to quality service, uncompromising integrity, and a long-term commitment to our customers. As a full service commercial real estate company, we provide our customers with the quality of service and piece of mind that only our expertise and experience can bring.

Choosing a facility for your business is a decision that has long-lasting impact; however, a building with the right fit may not be available when you need it.

Our ability to design and construct custom facilities for lease sets Woodward Commercial Realty apart from the crowd. We have developed nearly 3 million square feet ranging from manufacturing plants and warehouses to retail centers, corporate headquarters, and Class A office and medical office spaces.

Our goal is to ensure that you have a first-class facility of which you can be proud. You know what your business needs. We know commercial real estate.
