

Castille at Carillon

Green Initiatives

- Janitorial staff uses green cleaning materials and microfiber technology to optimize building lifecycle performance, and take the path of cleaning for health & the environment by use of environmentally sustainable products.
- Landscapers use a green building initiative/sustainable site management plan. This includes the use of drought tolerant plant material, using low impact fertilization applications, using drip and low volume irrigation when possible, & minimizing irrigation where applicable.
- Interior plantscaping provider is an organic plant care company.
- Maintenance staff is involved with light bulb recycling, including ballasts.
- Building's recycling program includes glass, corrugated boxes, aluminum/metal, plastics, cardboard, magazines, junk mail, newspapers, phone books, shredded paper.
- Tenant's recent recycling efforts at Castille at Carillon have effectively saved:
 - ⇒ 155 trees
 - ⇒ 64,000 gallons of water
 - ⇒ 2,500 gallons of oil
 - ⇒ 220 gallons of gas
 - ⇒ 46,300 kw hours
 - ⇒ 45 cu/yd landfill space
