Genest proposed loading dock concepts

Options

- #1 - This plan as shown
- #2 - increase depth of addition where it meets the existing bldg. to 20' or so to allow more room for offloading.
- #3 - come out from bldg. about 23' to 25' by approx 15' to 18' deep (front to back) to form a rectangle then add the 12' wide OH door toward the left side of the front facing wall

Should be enough room for trucks to back in
