Untreated or poorly treated water contains parasites, bacteria, and viruses that cause serious disease. D.H.H Title 51, Subsection 707 states: "Individual sewerage systems shall be kept in service and in serviceable condition sufficient to insure compliance with this code and in order to avoid creating or contributing to a nuisance or public health hazard."

Severe Infection - result of contact with untreated water where there are cuts or abrasions on the skin.

A residential sewerage treatment system that is not properly operated or maintained may also result in the pooling of improperly treated water at the surface.
